For immediately life-threatening emergency medical situations that arise while boarding:

Fort Hunt Animal Hospital's healthcare team provides superior pet health care and caring attention to every family member every time. We strive to perform at our best and demonstrate an AAHA standard care of excellent veterinary practice. If for any reason your pet is in an emergency state and cardiopulmonary resuscitation (CPR) is needed, we require all hospitalized and boarding pets to have a "code" status to allow for the fastest response possible. **Please initial ONE of the following options:**

OPTION #1: MAXIMUM RESUSCITATIVE EFFORTS AUTHORIZED

I request that the doctors and staff perform CPCR procedures to revive my pet, which may include any or all of the following procedures: endotracheal intubation, oxygen support, administration of emergency drugs, and chest compressions. As with all services provided by Fort Hunt Animal Hospital, payment for these services will be made at the time they are rendered, regardless of the outcome. I accept that if the hospital staff is unable to reach me within 10 minutes after the initiation of CPCR procedures, and after exercising reasonable medical judgment, determine that there appears to be virtually no hope for medical success, they will cease further CPCR procedures and administer a medication to help my pet pass peacefully (euthanasia). I understand that despite the best efforts of the doctors and staff at this facility, even the most successful CPCR that restores my pet's life may not allow my pet to regain his/her normal mental and physical health. _____ Owners Initials

OPTION #2: DO NOT RESUSCITATE (DNR)

I do not wish for Fort Hunt Animal Hospital to attempt resuscitation of my pet. I elect, instead, that the attending doctor administer a medication to help my pet pass away peacefully (euthanasia). This order does not affect comfort or other medically indicated care.
